

JBE-2160R

Red base for detectors and sounders
with 2 contacts

Key Features

- Polarity-insensitive
- Compatible base with JBE-2235 addressable sounder.
- EN54 approved.

TECHNICAL DATA

Dimensions	17 x 97 mm
Colour	Red
Environment	Indoor

This base makes cable installation as simple as possible. Wiring errors are reduced in this base, as there are only two terminals, where the wire must be connected.

JBE loop devices are polarity-insensitive, so each wire of the loop can be connected to any of the two available terminals.

Mechanism for locking the device to the base.

This base is compatible with all our addressable detectors.
